Arbor MIS integration guide

A third party application used by your school uses Wonde to access school data from a number of MIS providers such as Arbor. As your school is yet to have the integration setup with Wonde the following steps need to be completed.

Integrating Wonde with Arbor:

The process of integrating with Wonde is very simple.

1. Wonde will request access to your school through the Arbor Portal.
2. To approve access to Wonde from your system please log into your Arbor system as an administrator.
3. Click on System, Partner Apps (API Users).

4. You will then see Wonde in the 'Pending Requests', please then click on approve. If there is no pending request for Wonde please get in touch with us at support@wonde.com or calling us on 01638 779144 so we can request your school.
5. Once this is approved an automated email will be sent to Wonde and the Wonde team will then complete the process and confirm the connection is working successfully.
